Why Quartz?

Quartz is more than beautiful. It is also one of nature's strongest minerals. Resistant to stains, scratches and cracks, quartz is impervious to heat and cold and to common household chemicals. Quartz surfaces combine form and function, allowing for the most diverse, durable and practical applications. Our surfaces retain the cool, tactile qualities of natural stone – while offering design freedom with almost unlimited application possibilities. Whether for countertops, backsplashes, vanity tops or wall paneling, you can pick a design that combines international trends with your own personal lifestyle.

Quartz Pioneer

Caesarstone's original quartz surface was a pioneering innovation in 1987. Since then, we've developed thousands of designs, hundreds of prototypes and launched dozens of successful new products, with more in the pipeline each and every year. Today, you'll find us worldwide, in over 40 countries. Our surfaces consist of up to 93% quartz. They come from our state-of-the-art manufacturing facilities, utilizing the most advanced technologies available. Based on our accumulated know how over the years, our production processes comply with the highest standards of quality control and environmental responsibility.
